

homework

1. You pay 22% of your health insurance. The insurance premium is \$4,200 per year. How much do you have to pay for insurance?
2. Your employer pays 90% of you health insurance. If your insurance premium is \$6,200 per year, how much is your biweekly deduction from your paycheck for the cost of health insurance?

$$\textcircled{1} \quad 22\% \text{ of } 4200$$

$$.22 \times 4200$$

$$= \underline{\underline{\$924}}$$

$$\textcircled{2} \quad 10\% \text{ of } 6200$$

$$.10 \times 6200$$

$$\frac{\$620}{26} = \textcircled{\$23.85}$$

3. If you get 2 weeks paid vacation and make \$40,000 per year, what is the value of your paid vacation?

③ 50 WEEKS

$$\frac{40,000}{26} = ?$$

\$1,538.46
